The Coordinating Board for Higher Education and Missouri Department of Higher Education are pleased to present the annual report for fiscal year 2016.

One of our most significant accomplishments this past year was the adoption of a new coordinated plan for higher education in Missouri.

To create this new plan, we traveled across the state to hold nine public hearings to learn more about Missouri’s higher education needs.

Assisted by a 36-member steering committee, we spent many hours discussing the importance of higher education to the future of our state.

We met with educators, business owners, government and community leaders, national higher education experts, and students to consider ways we could make our higher education system stronger and increase educational opportunities for all Missourians.

Working with the steering committee, we established goals and strategies and created a plan that will guide our work in the years ahead.

Preparing Missourians to Succeed: A Blueprint for Higher Education focuses on increasing higher education attainment in Missouri, ensuring affordability, maintaining quality educational opportunities, promoting the importance of academic research and innovation, and fostering partnerships that will help us achieve these goals.

Higher education has never been more important for our students and our state. By 2018, more than 60 percent of the jobs in Missouri will require a two- or four-year degree or professional certificate. A knowledgable and skilled workforce is essential to a strong economy and a good quality of life.

As fiscal year 2016 came to a close, legislation containing a number of measures that will support our new plan was signed into law.

With a new plan in place and new legislative initiatives to implement, we are focused on strengthening our higher education system and helping more Missourians earn a degree.

Brian Fogle, Chair  
Coordinating Board for Higher Education

Vision
Missouri will be a national leader in providing high-quality postsecondary education that will equip Missourians with the personal and professional skills to succeed in the 21st century.

Mission
The Coordinating Board for Higher Education and the Missouri Department of Higher Education will collaborate with stakeholders to deliver a coordinated postsecondary education system that provides accessible, affordable and innovative education that supports economic growth, enhances civic engagement and improves the quality of life for all Missourians.
The Coordinating Board for Higher Education was authorized by an amendment to the Missouri Constitution in 1972 and established by statute in the Omnibus State Reorganization Act of 1974.

Board members – one from each of Missouri’s eight congressional districts and one selected at large – are appointed by the governor with the advice and consent of the senate and serve six-year terms.

The Missouri Department of Higher Education, led by the Commissioner of Higher Education, serves as the administrative arm of the Coordinating Board.

**New board members**
Gov. Jay Nixon nominated three new members for the Coordinating Board during 2016: Sam Murphey, District 1; John Siscel, Member at Large; and Mike Thompson, District 6.

**New commissioner**
The Coordinating Board appointed Zora Mulligan commissioner of higher education, following the retirement of David Russell in February 2016. Russell had served as commissioner of higher education since June 2010.

Note: The District 2 and District 5 seats are currently vacant.
Guiding principles

A set of guiding principles directs the work of the Coordinating Board for Higher Education and Missouri Department of Higher Education.

• Today's society demands citizens with education beyond high school. Higher education must provide students with the knowledge and skills necessary to succeed in a global economy and instill in them a commitment to lifelong learning, social responsibility and service to society.

• To ensure success, more Missourians must be able to access, afford and complete postsecondary education at an institution that best fits their educational needs, goals and potential.

• The strength of Missouri's higher education system is defined by the diversity of its institutional missions, its students and the educational opportunities available to them.

• Missouri’s higher education system must be accountable for learning outcomes and demonstrate responsible stewardship of public funds.

• Basic and applied research, the creation of knowledge, and the application of information to solve problems should be recognized and supported as essential functions of Missouri’s higher education system.

• Higher education must be valued as both a private benefit that contributes to personal enrichment and prosperity and a public good, essential to increased economic opportunity, civic engagement and a better quality of life for all Missourians.

Higher education must provide students with the knowledge and skills necessary to succeed in a global economy and instill in them a commitment to lifelong learning, social responsibility and service to society.
Responsibilities

The Coordinating Board for Higher Education and Department of Higher Education are responsible for numerous programs and policies that impact the state’s higher education system.

Major department functions include:

Planning
- Develop and implement a coordinated plan for higher education.
- Review the missions of Missouri’s public colleges and universities.
- Collect and analyze higher education data and prepare reports.
- Coordinate performance funding for public higher education institutions.

Fiscal responsibilities
- Coordinate and submit a unified higher education budget request for Missouri’s public higher education institutions.
- Review tuition rates set by the state’s public colleges and universities and oversee tuition stabilization under the Higher Education Student Funding Act approved in 2007.

Academic programs
- Approve new academic degree programs offered by public colleges and universities.
- Review academic programs every five years.
- Approve off-site programs offered by public colleges and universities.
- Facilitate the “reverse transfer” of credit from four-year institutions to two-year institutions for the awarding of associate degrees.
- Maintain a “library” of courses that transfer among all public and participating private colleges and universities.
- Develop and promote best practices in remedial education and other programs to increase college completion rates.

College access
- Conduct programs and provide publications about planning and paying for college to Missouri students and their families.
- Coordinate programs to assist students with applying for federal and state financial aid and completing college applications.
- Promote financial literacy and administer a default prevention grant program that promotes financial responsibility and repayment of student loans.

Coordination
- Promote the development of cooperative agreements between public four-year higher education institutions that allow those with graduate degrees to offer those programs on the campuses of public institutions that do not have graduate degree programs.
- Coordinate agreements with out-of-state institutions to reduce the cost of attendance for Missouri students.

Financial aid
- Administer 13 student financial aid programs, including the A+ Scholarship, Bright Flight Scholarship and Access Missouri Grant programs.
- Administer the Missouri Student Loan Program. Although the department no longer guarantees new loans issued by the federal government, it continues to service and maintain its existing portfolio of outstanding guaranteed loans.

Proprietary schools
- Certify and oversee more than 150 proprietary schools with a focus on consumer protection to ensure students receive education and training consistent with the objectives published by the schools.
A new plan for higher education in Missouri

The Coordinating Board for Higher Education approved a new coordinated plan for Missouri’s higher education system in January 2016.

State law calls for the board to develop and implement a coordinated plan for higher education in Missouri. The last plan was adopted in 2008.

The new plan, Preparing Missourians to Succeed: A Blueprint for Higher Education, will guide the work of the board and the Department of Higher Education for the next five years.

A 36-member steering committee assisted with the development of the plan. Nine public hearings were held across the state to gather information from educators, government officials, business and community leaders, students and the general public.

The plan focuses on the need to increase higher education attainment in the state.

By 2018, approximately 60 percent of the jobs in Missouri will require a postsecondary credential. Currently, about 50.6 percent of working-age adults in the state have a two- or four-year degree or professional certificate.

The plan includes five goals:

**Goal 1: Attainment**
Missouri will increase the proportion of working-age adults with high-quality, affordable postsecondary credentials to 60 percent by 2025.

**Goal 2: Affordability**
Missouri will rank among the 10 most affordable states in which to obtain a postsecondary degree or certificate by 2025.

**Goal 3: Quality**
Missouri will produce graduates with high quality postsecondary degrees and certificates that are valuable and relevant to individuals, employers, communities and the state.

**Goal 4: Research and innovation**
Missouri will be a top 10 state for investment in academic research by 2025.

**Goal 5: Investment, advocacy and partnerships**
Missouri will promote greater investment in a culture of postsecondary education through increased advocacy and powerful partnerships with education, business, government and communities.

The Blueprint calls for new policies, programs and partnerships necessary for a higher education system that will contribute to a thriving economy and a good quality of life for all Missourians.

Learn more about Missouri’s Blueprint for Higher Education at dhe.mo.gov/blueprint.php.
Missouri’s higher education system

Missouri is home to a diverse higher education system that offers a variety of degree and certificate programs. The system includes 13 public four-year universities, 14 public two-year colleges, 25 independent colleges, 10 specialized/technical colleges, 18 theological institutions and approximately 150 proprietary career schools.

For more information about Missouri’s higher education system, visit dhe.mo.gov.

Enrollment

Fall 2015 enrollment at Missouri’s four-year public universities increased slightly while enrollment at community colleges and Missouri’s independent colleges and universities declined.

Missouri’s public higher education institutions enrolled 248,100 students – a full-time equivalent enrollment of 180,347 students. The state’s independent colleges and universities enrolled 128,636 students – a full-time equivalent of 93,006 students.

Total head-count enrollment decreased 2.1 percent from fall 2014 to fall 2015. Full-time equivalent enrollment decreased by 1.8 percent.

Detailed enrollment information is located in Appendix A.

Academic Program Approval

New degree and certificate programs, changes to existing programs and the off-site delivery of programs offered by Missouri’s public colleges and universities are reviewed by the department and approved by the Coordinating Board for Higher Education.

During fiscal year 2016, the Coordinating Board approved 133 new academic programs and 155 program changes at the state’s public colleges and universities.

The department also reviews and comments on new degree programs offered at Missouri’s independent higher education institutions.

A complete list of academic program actions is provided in Appendix F.
Proprietary Schools
The department certifies and oversees standards for approximately 150 proprietary schools (private career schools) that provide education and training in nearly 4,000 degree and certificate programs in Missouri.

The proprietary school certification program helps ensure students are treated fairly and receive education and training consistent with the published objectives of the schools.

Certification
During fiscal year 2016, the department renewed the certification of 132 existing proprietary schools, received 76 application requests, certified 11 schools to operate, granted exemption from certification standards to four schools and denied recertification to one school. Department staff also monitored the closing of 18 certified schools.

Enrollment
Enrollment at proprietary schools certified to operate by the department remains well below the peak reached in 2013. In 2015, enrollment numbers plateaued, at least temporarily. The number of students enrolled in Missouri proprietary schools rose slightly over the previous year, from 46,820 to 48,816, an increase of approximately four percent.

The number of students enrolled in non-Missouri degree-granting institutions (regionally accredited institutions offering instruction in the state) also increased, from 8,153 to 9,054, a rise of 11 percent.

While these increases mark a departure from recent enrollment declines among proprietary institutions, they are expected to be temporary. The onset of additional federal regulations focusing on the proprietary school industry will likely lead some schools to become more selective in their enrollment policies or reduce the number of program offerings. Increased federal scrutiny of this sector has led to the closure of several large schools since these data were compiled.

Enrollment numbers reported by distance education providers based outside of the state that recruit Missouri students decreased from 8,973 to 7,892, a decline of slightly more than 12 percent. This change is likely due to the implementation of a state reciprocity process for distance education (State Authorization Reciprocity Agreements or SARA) that has reduced the number of institutions located outside of Missouri that must be certified by the department.

Completion
Although the decline in enrollment at proprietary schools in Missouri has temporarily abated, the number of students completing degrees and certificates at these institutions is now showing a substantial decrease, reflecting enrollment declines in previous years. Total completions decreased from 18,543 in 2014 to 14,482 in 2015, a drop of approximately 20 percent.

More information about Missouri’s proprietary school enrollment is located in Appendix A.
Helping more Missouri students earn a degree

Missouri is making progress on increasing higher education attainment. The Department of Higher Education is working with high schools and colleges and universities across the state to help more students access higher education and succeed in earning a degree or certificate.

Policymakers and educators are expanding higher education opportunities and adopting a variety of strategies to increase college completion rates.

Degree Attainment
The percentage of working-age adults in Missouri with a certificate or degree continues to grow. Currently, about 50.6 percent of Missouri residents have earned a certificate or two- or four-year degree.

The Coordinating Board has set a goal for 60 percent of Missourians to have a certificate or degree by 2025 to meet Missouri’s need for a knowledgeable and skilled workforce.

Improving college completion rates will be key to achieving the state’s higher education goal. In 2014, about 60 percent of first-time, full-time students at Missouri’s public universities earned a bachelor’s degree in six years. Just over 39 percent of first-time, full-time students at Missouri’s community colleges earned an associate degree or transferred to another higher education institution in three years.

Student Outreach
The department’s Journey to College initiative offers information about the college-planning process to thousands of Missouri students and their families every year.

Journey to College provides high schools, colleges and community organizations with resources and training for three college access programs:

- Apply Missouri helps students find the best fit for higher education based on their plans for the future and offers time during the school day to complete and submit college applications. In 2015, nearly 5,000 students submitted about 5,200 applications to higher education institutions during Apply Missouri events.
• FAFSA Frenzy provides free professional assistance to help students and families complete the Free Application for Federal Student Aid, which is required for many grants, scholarships and loans. In 2016, more than 1,500 students participated in 100 FAFSA Frenzy events across Missouri.

• Decision Day encourages students to finalize and follow through with their plans for higher education or military service. The department launched the program in May 2015 with more than 60 schools hosting Decision Day activities.

The department also provides publications, presentations and social media that offer a variety of information about planning and paying for college.

For more information about the Journey to College initiative, visit dhe.mo.gov/ppc/journeytocollege.php.

Remedial Education
The department has been collaborating with colleges and universities throughout Missouri to shift the state’s approach to remedial education.

For many years, students who did not score at a certain level on assessments aimed at determining college readiness have been required to complete remedial, or developmental, classes before enrolling in colleges courses for which they could earn credit toward a degree.

Because this approach has not significantly improved graduation rates, the department is working with higher education institutions to implement “co-remediation.” This new approach calls for students to enroll in credit-bearing courses immediately rather than requiring them to first complete remedial classes. Co-remediation provides additional academic support to help students succeed in credit-bearing courses.

The department was selected as one of six states to participate in a national co-remediation initiative led by Complete College America, a nonprofit organization working to increase college completion rates in the United States.

Through the department’s Corequisite at Scale program, two workgroups – one comprised of English faculty and one comprised of math faculty – are working to implement co-remediation statewide. Missouri colleges and universities participating in the initiative plan to have corequisite courses in place by fall 2018.

Math Pathways
The department is working with a task force of educators from across the state to develop new “math pathways” for students who would benefit from mathematics classes that are aligned to specific fields of study.

For many students, college algebra has been a “bottleneck course” – one that is required for graduation but has high withdrawal and failure rates, preventing some students from completing their degree. Improving student success in math courses could, ultimately, increase college completion rates.

The Missouri Mathematics Pathways initiative is supported by a growing number of math educators who believe that college algebra, in many cases, is not the best math course for a number of students. They advocate for alternative math pathways for students who are not majoring in science, technology, engineering or math (STEM). Courses such as statistics and
quantitative reasoning could be more useful for students working on non-STEM degrees such as business, history and English.

College administrators and math educators at all public colleges and universities and a number of independent higher education institutions are working to establish new math pathways.

Missouri was one of five states selected to participate in a national project focused on developing alternatives to college algebra. The department and more than two dozen Missouri colleges and universities are involved in the three-year initiative.

For more information about the math pathways initiative, visit dhe.mo.gov/AAU-Initiatives-MathPathways.php.

**Dual Credit**
The department strengthened its policy for dual credit classes, which give students an opportunity to earn college credit while attending high school.

Dual credit classes can assist students with the transition from high school to college and help them save time and money as they work toward a degree.

Currently, more than 35 Missouri colleges and universities offer dual credit classes at about 600 high schools in the state. About 40,000 students enroll in the classes each year.

One of the primary purposes of the revised policy is to ensure that dual credit classes deliver quality, college-level instruction that will help prepare students to succeed in college.

The department also established an Early College Advisory Board to assist in monitoring Missouri’s dual credit programs. Representatives from public and private colleges and high schools serve on the board.
Credit Transfer
The ability for students to transfer credit from one college to another is essential to reducing college costs and increasing degree completion. In 2015, more than 22,500 students transferred college credit to a public or independent college or university in Missouri.

In recent years, the department has implemented several programs to improve the transfer of college credit.

The Missouri Transfer Course Library is a group of 26 lower-division courses that transfer as one-to-one equivalent courses among all public and participating independent colleges and universities.

For more information about the transfer course library, visit dhe.mo.gov/CoreTransfer.php.

The Missouri Reverse Transfer Program allows students to use credit they have earned at two- and four-year higher education institutions to qualify for an associate degree. Students who have completed at least 15 credit hours at a qualifying two-year college and transferred to a four-year college can transfer credit back to the two-year college to receive an associate degree.

For more information about reverse transfer, visit dhe.mo.gov/MOReverseTransfer.php.

Legislation approved during the 2016 legislative session calls on the department to establish a standard core curriculum of at least 42 credit hours that will transfer among all community colleges and public four-year higher education institutions in the state.

The core curriculum will cover mathematics, English, communications, humanities, biological and physical science, social science and computer technology.

The department is working with colleges and universities to have the 42-hour block in place for the fall 2018 semester.

15 to Finish
The department has begun work on a program to encourage full-time college students to complete at least 15 credit hours a semester to earn an associate degree in two years or a bachelor's degree in four years.

Legislation approved in 2016 established the 15 to Finish Act to increase college completion and reduce college costs.

On-time college completion can help students save time and money. An additional year in college can cost more than $50,000 in tuition, fees, room and board, and lost wages students would have earned had they graduated and joined the workforce. Currently, less than one-third of college students in Missouri earn an average of 15 credit hours per semester.

The 15 to Finish program encourages students to:

- Know how many credits they need to earn the degree they are seeking.
- Complete 15 or more credit hours a semester to earn an associate degree in two years or a bachelor's degree in four years.
- Consider all options, including online courses and summer school, to graduate on time.

For more information about the 15 to Finish program, visit dhe.mo.gov/initiatives/fifteentofinish.php.
Keeping college affordable for Missouri families

Missouri is working to help ensure students have the means to pay for higher education. While tuition in many states has grown faster than the rate of inflation, Missouri’s public colleges and universities have kept tuition increases well below the national average.

More funding for colleges and universities and state financial aid programs is helping to keep higher education affordable for thousands of Missouri students and their families.

Tuition

Tuition increases at the state’s public colleges and universities have ranked among the lowest in the nation for the past several years.

According to the College Board, tuition and required fees at Missouri’s public colleges and universities grew by just 9 percent between 2008-09 and 2015-16. The average tuition increase nationwide was 33.5 percent during the same time period.

While tuition rates are set by the governing board of each college and university in the state, Missouri’s Higher Education Student Funding Act, approved in 2007, helps control tuition costs. Colleges and universities must limit tuition increases based on the Consumer Price Index or pay a penalty unless they receive a waiver from the commissioner of higher education.

Student Financial Aid

To help Missouri families pay for higher education, the department awarded nearly $120 million dollars in state financial aid to about 68,000 students during fiscal year 2016.

The majority of state financial aid is provided through three programs: the Access Missouri Grant Program, the A+ Scholarship Program and the Bright Flight Program.

Access Missouri, the state’s only program based on student financial need, was awarded to about 48,300 students during the 2015-16 academic year.

Bright Flight, a merit-based program that encourages top-ranking high school seniors to attend a Missouri college or university, was
awarded to nearly 6,700 students during the 2015-16 academic year.

The A+ Scholarship Program provides funds to qualifying graduates of A+ designated high schools who attend a participating public two-year higher education institution or vocational/technical school or certain private two-year vocational/technical school. The scholarship was awarded to more than 12,600 students during the 2015-16 academic year.

More information about Missouri’s student financial aid programs is located in Appendix C.

**FAFSA Completion Project**

The Missouri FAFSA Completion Project was launched during fiscal year 2016 to increase the percentage of high school seniors filing a Free Application for Financial Aid.

FAFSA completion is key to making higher education more affordable. Students must file a FAFSA to be eligible for most types of federal and state financial aid.

Too often high school seniors believe they have successfully completed the FAFSA – only to discover later that their application contained one or more errors that prevented them from receiving financial aid, including grants, scholarships and loans.

The FAFSA Completion Project provides a secure online tool that enables school administrators to notify students when incomplete or incorrect information prevents their financial aid application from being finalized. This gives students and their families an opportunity to correct errors on the application in order to meet deadlines for financial aid programs including the Access Missouri Grant and A+ Scholarship.

By June 2016, more than 100 school districts had registered to use the system.

The web page also provides information about completing the FAFSA and the department’s FAFSA Frenzy program, which offers free assistance to help students and their families complete the financial aid application.

For more information about the Missouri FAFSA Completion Project, visit dhe.mo.gov/fafsa-completion/.

**Default Prevention Program**

The Default Prevention Program works to educate students about a variety of personal finance issues, including paying for college and minimizing student loan debt.

The program provides Default Prevention Grants to higher education institutions to fund programs designed to help students make smart financial decisions, understand how student loans can impact their future and prevent student loan default. The department awarded default prevention grants to 30 Missouri colleges and universities for the 2015-16 school year.

Department staff also provide training and assistance to financial aid officers at Missouri’s higher education institutions.

In addition, the department publishes instructional materials for personal finance teachers at high schools across the state. The *Smart About Spending* materials include a teacher’s guide and student workbooks for personal finance instruction required by the Missouri Department of Elementary and Secondary Education for public high school students in Missouri.
Providing quality educational opportunities

Providing quality higher education opportunities to students across the state is key to Missouri’s future.

Higher education officials are looking at how Missouri’s colleges and universities are meeting the state’s needs. They are exploring new ways to provide instruction, measure student learning and provide Missourians with the knowledge and skills they need to succeed in the workplace.

Higher Education System Review

The Coordinating Board appointed a task force in June 2016 to begin a review of Missouri’s higher education system to assess how effectively the system is meeting Missouri’s higher education needs.

The task force, which includes representatives from the state’s public colleges and universities and the commissioner of higher education is working with the National Center for Higher Education Management Systems to conduct the review.

The task force is focusing on four goals:

- Establish an inventory of each higher education institution’s mission, including the population it serves; the array of degrees, programs and services it offers; and any special or unique features.
- Conduct a gap analysis comparing current degree production with short- and long-term workforce needs, and make recommendations based on that analysis.
- Obtain expert advice on critical issues including individual institutions’ mission/role/scope and the department’s program review and approval process.
- Identify issues that need to be addressed over a longer period of time.

A report will be presented to the Coordinating Board in December 2016.

For more information about the higher education system review, visit dhe.mo.gov/initiatives/systemreview.php.
**Performance Funding**

Performance funding allocates new state funding for Missouri’s public colleges and universities based on their performance on a variety of measures including college completion rates, freshmen-to-sophomore retention rates, student success in developmental education courses and financial efficiency.

Fiscal year 2016 marked the third year higher education institutions in Missouri received a portion of their funding based on the state’s performance funding model.

During the 2014 legislative session, performance funding was codified in state statute, with at least 90 percent of new core funding distributed through the performance funding model and no more than 10 percent distributed through an equity formula developed by each institutional sector.

The legislation also directed public higher education institutions to develop a sixth performance measure based on “student job placement in a field or position associated with the student’s degree level and pursuit of a graduate degree.” The department is continuing its work to implement the sixth performance measure.

In fiscal year 2016, approximately $10.5 million was appropriated through the performance funding model. All of Missouri’s four-year public universities met at least four performance measures, and 90 percent met five measures. All of Missouri’s two-year public colleges met at least two performance measures; 93 percent met three measures; 64 percent met four measures; and 43 percent met all five measures.

Since fiscal year 2014, Missouri’s performance funding has allocated more than $76 million among the state’s public two and four-year colleges and universities.

More information about performance funding is provided in Appendix D.
Measuring Student Learning
Missouri was one of nine states chosen to participate in a national pilot project that focused on improving teaching and learning at the college level. The project, which concluded in October 2015, measured student learning based on course work rather than test scores.

Faculty representing nearly 70 colleges and universities, including six Missouri higher education institutions, participated in the project. Faculty members used rubrics to measure quantitative reasoning, critical thinking and written communications – three of the most important areas students must master to be successful in the workplace.

The Multi-State Collaborative to Advance Learning Outcomes Assessment was sponsored by the State Higher Education Executive Officers Association and the Association of American Colleges and Universities.

With the conclusion of the pilot, three more states joined the original nine states to continue the project for an additional year.

Improving Teacher Quality
The Improving Teaching Quality Grant focuses on strengthening the teaching of math, science and literacy skills through professional development for K-12 teachers and administrators.

The grant, administered by the department, provides federal funding for partnerships between high-need K-12 school districts and colleges and universities that offer professional development opportunities. Projects funded by the grant focus on knowledge and skill development, standards alignment, data system competencies, literacy, integration of content and assessment to inform instruction.

The department provides oversight and technical assistance throughout the grant projects.

Since the program began in 2001, over 90 grant projects have been funded in more than 300 school districts, providing professional development opportunities to more than 2,000 Missouri teachers.

A+ Scholarship Program (Section 160.545 RSMo)

The A+ Scholarship serves graduates of A+ designated high schools who meet certain academic and other requirements while in high school and attend a public two-year higher education institution or vocational/technical school, or certain private two-year vocational/technical schools. Award amounts are based on the student’s actual tuition and general fees after the Pell Grant and other federal, non-loan funding, has been applied.

Access Missouri Financial Assistance Program (Section 173.1101-1107, RSMo)

The Access Missouri Program provides need-based grants to students with an Expected Family Contribution (EFC) of $12,000 or less, based on the Free Application for Federal Student Aid (FAFSA). Award amounts vary depending on a student’s EFC as well as the type of school attended.

In fiscal year 2016, actual maximum and minimum award amounts were $850 and $300, respectively, for students attending public two-year institutions. For students attending public four-year institutions, State Technical College of Missouri, and independent institutions, the maximum and minimum award amounts were $1,850 and $1,500, respectively.
**Advanced Placement Incentive Grant (Section 173.1350, RSMo)**

The Advanced Placement Incentive Grant is a nonrenewable grant designed to encourage high school students to take and score well on Advanced Placement exams in mathematics and science. To qualify for the $500 award students must achieve a score of three or higher on at least two designated Advanced Placement exams while attending a Missouri public high school. Students must also receive an award under the Access Missouri Financial Assistance Program or the A+ Scholarship Program in the same academic year they receive this grant.

**Higher Education Academic Scholarship, or “Bright Flight” (Section 173.250, RSMo)**

The Bright Flight scholarship is a merit-based scholarship for students who achieve an ACT or SAT score in the top 5 percent on or before the June test date of their senior year in high school. Award amounts are tiered based on whether the student’s score is in the top 3 percent or top 4th and 5th percentiles. The qualifying scores are determined at the beginning of the student’s senior year in high school and are based on the scores achieved by the Missouri seniors in the preceding graduating class.

Eligible students scoring in the top 3 percent may receive up to $3,000 annually. The annual award for students scoring in the top 4th and 5th percentiles is up to $1,000. Students qualifying in the top 3 percent must receive the maximum $3,000 award before students in the top 4th and 5th percentiles can be funded.

To be eligible in the top 3 percent in fiscal year 2016, high school seniors had to achieve:
- An ACT score of 31 or better or
- An SAT score of 800 in critical reading AND 800 in math or better.

To be eligible in the top 4th and 5th percentiles in fiscal year 2016, high school seniors had to achieve:
- An ACT score of 30 or
- An SAT score of 770 to 799 in critical reading AND 770 to 799 in math

Although the students qualifying in the top 3 percent received the maximum $3,000 award in fiscal year 2016, program funding was insufficient to fund the students qualifying in the top 4th and 5th percentiles. Unfunded students who maintain their eligibility may receive an award in the future if funding becomes available.

**Kids’ Chance Scholarship Program (Sections 173.254-173.258, RSMo)**

The Kids’ Chance Scholarship Program, created in 1998, provides scholarships for the children of workers who were seriously injured or died in a work-related accident or occupational disease covered by workers’ compensation and compensable under Chapter 287, RSMo. The scholarships are funded from the interest generated from the Kids’ Chance Scholarship Fund. The legislation requires the Division of Worker’s Compensation to deposit $50,000 per year into the fund, with the last deposit scheduled for October 2018 resulting in a principal total of $1 million.
Marguerite Ross Barnett Memorial Scholarship Program (Section 173.262, RSMo)

The Marguerite Ross Barnett Memorial Scholarship, originally referred to as the Competitiveness Scholarship Program, is for students who are enrolled part time (six to 11 credit hours) and who work at least 20 hours per week. Students must demonstrate financial need to qualify. The scholarship may be renewed annually for 150 semester credit hours or until students earn a baccalaureate degree, whichever occurs first. The maximum award is the lesser of the actual tuition charged at the school in which the student is enrolled part time, or the amount of tuition charged an undergraduate Missouri resident enrolled part time in the same class level and academic major at the University of Missouri-Columbia. The actual tuition charged is based on six credit hours for students enrolled in six, seven or eight credit hours and nine credit hours for students enrolled in nine, 10 or 11 credit hours.

Beginning in 2013, the Marguerite Ross Barnett Memorial Scholarship appropriation was amended to allow awards for this program to be made with unspent funds from the Minority Teaching Scholarship, Public Safety Officer or Employee's Child Survivor Grant, Vietnam Veteran's Survivor Grant, and Wartime Veteran's Survivors Grant programs.

Minority Teaching Scholarship (Section 161.415, RSMo)

The Minority Teaching Scholarship is a loan forgiveness program designed to attract academically talented undergraduate or graduate students into the teaching profession. Graduate student recipients must commit to teaching in the fields of math or science. Up to 100 students may be awarded $2,000 annually. For students who obtain a teaching certificate and teach full-time in a Missouri public elementary or secondary school for five years, the loan converts to a scholarship. One-fifth of the student's total loans are forgiven for each year of qualifying employment.

Minority and Underrepresented Environmental Literacy Program (Section 173.240, RSMo)

The Minority and Underrepresented Environmental Literacy Program is a scholarship program that assists academically talented minority and underrepresented individuals pursuing an undergraduate or graduate degree in an environmental course of study. Applicants are selected by the Minority Environmental Literacy Advisory Committee based on academic achievement as evidenced by grade point average and standardized test scores, involvement in school and community activities, and leadership characteristics. The MDHE determines award amounts based on the amount of funding appropriated to the program and the number of eligible applicants.

Public Safety Officer or Employee's Child Survivor Grant Program (Section 173.260, RSMo)

The Public Safety Officer or Employee's Child Survivor Grant Program is a program for public safety officers who were permanently and totally disabled in the line of duty. Children under 24 years of age who are dependents of officers or dependents of Missouri Department of Transportation employees engaged in the construction or maintenance of the state's highways, roads and bridges killed or totally and permanently disabled in the line of duty, as well as the spouses of officers killed or totally and permanently disabled in the line of duty, are also eligible. The maximum grant amount
is the lesser of the actual tuition charged at the school in which the student is enrolled full time, or
the amount of tuition charged an undergraduate Missouri resident enrolled full time in the same
class level and academic major at the University of Missouri-Columbia. The grant may be renewed
annually until the student obtains a baccalaureate degree or, in the case of a dependent child, until
the student is 24 years of age, whichever occurs first.

Vietnam Veteran’s Survivor Grant Program (Section 173.236, RSMo)

The Vietnam Veteran's Survivor Grant Program, with a sunset effective Dec. 31, 2015, was for
children and spouses of Vietnam veterans whose deaths were attributed to, or caused by, exposure
to toxic chemicals during the Vietnam conflict. The maximum grant amount was the lesser of the
actual tuition charged by the school in which the student is enrolled full time or the average amount
of tuition charged an undergraduate Missouri resident enrolled full time in the same class level and
academic major at the regional public four-year Missouri institutions. The grant was eligible for
renewal annually until the student obtained a baccalaureate degree, completed 150 semester credit
hours, or received the grant for a total of 10 semesters. Eligibility ended at age 25 for children and
at the fifth anniversary of the veteran's death for spouses, regardless of whether the other renewal
thresholds had been met.

Wartime Veteran’s Survivors Grant Program (Section 173.234, RSMo)

The Wartime Veteran's Survivors Grant Program was designed to provide up to 25 grants for tuition
assistance, room and board, and books for students who are survivors of post 9/11 war veterans
whose deaths were a result of combat action or were attributable to an illness contracted while
serving in combat, or who became at least 80 percent disabled as a result of injuries sustained in
combat action. Although the Wartime Veteran's Survivors Grant program became effective in 2008,
the first award was made in 2011, which was the first year for which funds were appropriated for this
program.
Appendix D
Missouri performance funding
Missouri performance funding

In 2011, Gov. Jay Nixon directed the Missouri Department of Higher Education to develop a formula to allocate future funding increases to higher education institutions according to their performance.

A task force, appointed by the commissioner of higher education, developed a performance funding model in 2012 based on five performance indicators. Each higher education institution could earn one-fifth of its available performance funding by demonstrating success for each of its five performance measures.

Performance funding indicators established for Missouri’s public universities are:

- Student success and progress – freshman to sophomore retention or first-time, full-time freshmen completing 24 credit hours during their first academic year.
- Increased degree attainment – the total number of degrees awarded or the six-year graduation rate.
- Quality of student learning – improvements in assessments of general education or major field of study or improvements on professional/occupational licensure tests.
- Financial responsibility and efficiency – the percent of total education and general expenditures on the core mission of the college or university or the increase in education revenue per full-time student at or below the increase in the Consumer Price Index.
- An institution-specific measure approved by the Coordinating Board for Higher Education.

Indicators for Missouri’s public two-year colleges for fiscal year 2016 were:

- Three-year completion rate for first-time, full-time entering students.
- Percentage of developmental students successfully completing their last developmental English course and first college-level English course.
- Percentage of developmental students successfully completing their last developmental math course and first college-level math course.
- Percentage of career/technical students who pass their required licensure/certification examination.
- An institution-specific measure approved by the Coordinating Board for Higher Education that addresses financial responsibility, efficiency and affordability.

Most performance measures are evaluated based on a three-year rolling average. Success for each measure is defined as improvement over each institution’s performance from the previous year or, when applicable, maintenance of a high level of performance in relation to a previously established threshold. In some instances, year over year performance can be substituted for the three-year rolling average.

The performance funding indicators will be revised for the fiscal year 2018 funding cycle.

Appendix F

Academic program actions
Academic Program Actions

The Coordinating Board for Higher Education has statutory responsibility to approve new academic programs and program changes, regulate the off-site delivery of existing programs, and approve the establishment of residence centers and instructional sites by public higher education institutions. Independent institutions are requested to submit proposed new programs and programmatic changes for review and comment. Academic programs must be reviewed to be included in Missouri’s statewide inventory of approved programs.

In years past, a number of independent institutions opted not to submit new program proposals and program changes to the Department of Higher Education for review and comment. Due to increasing demands at the federal and state level for accountability from higher education institutions and the Coordinating Board, the purpose for the department’s program inventory has expanded from a system designed to provide students with program information to an official record of all approved higher education programs in the state. As a result, a growing number of independent institutions are collaborating with the department to have their programs reviewed and included in the program inventory, resulting in a significant number of new program submissions and program changes during fiscal year 2016.

In 2011, the Coordinating Board began issuing provisional approval for new academic programs. The department reviews each program five years from the date of its provisional approval, with the first reviews beginning in 2016. If the review indicates that the program is not performing as expected, the Coordinating Board may recommend the termination of the program, unless there are compelling justifications for continuing the program.

The following charts summarize the number of programs added, deleted, inactivated, withdrawn and conducted off-site for public and independent institutions during fiscal year 2016.

Off-site, Residence and Instructional Site Locations

The Coordinating Board for Higher Education has statutory responsibility to review and approve both the establishment of residence centers and the off-site delivery of existing programs, while also having the authority to monitor course delivery at instructional sites.

The following new off-site and residence center locations for public institutions were approved during fiscal year 2016 and were added to the CBHE Inventory of Off-Campus Instructional Sites.

Crowder College
Advanced Training and Technology Center
420 South Grand Avenue
Joplin, MO 64801

Missouri State University
Faught Administration Center
301 S. Main Campus Street
Nixa, Missouri 65714

Ozarks Technical Community College-Table Rock
10698 Highway 165
Hollister, MO 65672

Ozarks Technical Community College-Waynesville Center
600 GW Lane
Waynesville, MO 65583

Northwest Missouri State University
Northwest Missouri State University-Kansas City
6889 North Oak Trafficway
Gladstone, MO 64118

Saint Charles Community College
Pike/Lincoln Technical Center
430 Votech Road
Eolia, MO 63344

State Technical College of Missouri
R-II Elementary School (for two years)
1212 E. Main Campus St.
Linn, MO 65051

Three Rivers College
Three Rivers College-Caruthersville Center
903 West 13th Street
Caruthersville, MO 63830
Columbia College
Columbia College-Lexington
1880 Washington Avenue
Lexington, MO 64067

Columbia College-Parkade Center
601 Business Loop 70 West, Suite 108
Columbia, MO 65203

Ranken Technical College
755 Parr Road
Wentzville, MO 63385

Change of Address

Bolivar Technical College
1135 N. Oakland
Bolivar, MO 65613

Northwest Missouri State University-Kansas City
6889 North Oak Trafficway
Gladstone, MO 64118

Park University-Independence
20101 East Jackson Drive
Independence, MO 64057
